# RI TRANSPARENCY REPORT

2017

## Ontario Teachers' Pension Plan

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

## PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

## Usage restrictions

Public Transparency Reports are the intellectual property of PRI. In no case, can this report or any content of it be sold to other parties.

Third party organisations who have accessed Transparency reports outside of the Data Portal and intend to use those require the prior written consent of PRI (other than for internal use or research or for the sole benefit of the organisation whose report this refers to).

**SG 01.5** Describe your organisation's investment principles, and overall investment strategy, and how they consider ESG factors and real economy impact.

At Ontario Teachers', responsible investing is synonymous with effective stewardship. Quite simply, companies that are good at managing environmental, social and governance (ESG) factors are likely to make sound business decisions that support long-run sustainability. That makes them attractive investments for Ontario Teachers', with its long-term investment horizon. The pension plan's investments span the globe. We own stakes in more than 2500 companies, which collectively employ millions of people and operate in thousands of communities. We are evaluating a larger universe of risks than ever before, many of them interconnected. This necessitates a more comprehensive examination of global risk factors.

The plan's investment professionals evaluate company-specific factors as well as broader environmental, social and governance factors that could affect the long-term value of the investment portfolio. Considering all material ESG risk factors provides a forward-looking perspective and enhances our risk management capabilities. We also work with peer groups, governments, companies and other interested parties to develop global, consistent and relevant standards that will lead to better investment insight.

**SG 01.6** Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Please see our 2016 Responsible Investing Report on Ontario Teachers' website here: <https://www.otpp.com/investments/responsible-investing> and also the booklet on our responsible investing principles downloadable from the same site.

We take this approach because it helps us to achieve the best risk-return trade-off for our members. Therefore, at Ontario Teachers':

- We objectively consider and evaluate environmental, social and governance ("ESG") risks alongside other risk factors in our investment decision-making and asset management processes because we believe they can materially impact the value of our investments.
- We are active owners and take a responsible approach in our asset management practices. We believe that good governance is fundamental to effective responsible investing.
- We continue to expand our knowledge, deepen our understanding, and evolve our practices by continually assessing current and emerging ESG risks. We share experience across the Plan by fostering a culture of thought leadership and collaboration.
- We seek clear and relevant disclosure of information that may assist us in making investment decisions.
- We collaborate with like-minded investors to more effectively execute Responsible Investing.

----------	---

With regards to Private Equity, responsible investment factors are typically considered when evaluating new managers (Selection) and when working with existing managers post-investment (Monitoring). The integration of ESG factors into investment processes and portfolio company management by external managers is of particular interest. We seek to understand how each manager evaluates these factors as part of their investing process. Through this work, we create alignment of interest and foster the ongoing development of our collective responsible investing knowledge that advances the practice of responsible investing in private equity. We do not include specific responsible investing requirements in our contracts with GPs. Through interactions with managers, including through the limited partner advisory committee, we seek transparent discussion and disclosure of ESG efforts.

SAM 12.1

Provide examples of how ESG issues have been addressed in the manager selection, appointment and/or monitoring process for your organisation during the reporting year.

 Add Example 1

Topic or issue	Assess Private Equity Manager's ESG approach
Conducted by	Internal staff
Asset class	Private equity
Scope and process	We asked a prospective PE Partner to provide their ESG approach through our DDQ process. The PE firm was early in their development and thinking around ESG and how to incorporate these factors into their process. We provided them with examples of how other PE firms have integrated ESG factors into their investment approach.
Outcomes	The PE firm adopted an ESG policy and took steps to incorporate ESG into their overall investment approach.

 Add Example 2

Topic or issue	Assessment of Listed Equity external manager
Conducted by	Internal staff
Asset class	Listed Equity
Scope and process	ESG questions are incorporated in the RFP process to get an understanding of the manager's integration of ESG risks and opportunities into the investment decision making process. During the due diligence phase, a more detailed ESG survey is conducted to get to the heart of the ESG integration, including a review of the decision making structure, frameworks for integration, ownership of ESG risks, as well as systems used to help evaluate these risks. During ongoing monitoring of appointed managers, regular check-ins occur whereby questions are asked of names held in the portfolio, including a full review of the ESG score of the portfolio, as well as targeting a more fulsome review of the lowest scoring stocks.
Outcomes	We built a best practices manual that helps the team to gauge the quality and depth of ESG integration at the manager level that can be used going forward.

Investment decisions are rarely made on the basis of any single factor, financial or non-financial. Therefore, Ontario Teachers' Pension Plan does not screen out investments based solely on environmental, social or governance (ESG) criteria, but rather considers them in the context of the risks of the investment opportunity including characteristics such as their investment horizon. Our Investment Policy is clear on this point: "Investments should not be selected or rejected solely on the basis of ESG factors, which should only be taken into consideration to the extent that such factors have a material impact on the financial return of an investment."

----------	------------------------------------

With respect to the breakdown requested in question 24.2 and our response in 24.3:

We continue to struggle to understand the purpose of this question where votes are tracked by whether the signatory votes with or against management. We do not believe that this is an indicator of quality of an investor's approach to responsible investing. The implied message with this question, and one that we strongly disagree with, is that voting against management is aligned with an investor acting responsibly and voting with management is not. It's our view that using such a simplistic measure misses a key tenant of responsible investing – applying thoughtfully execution of their responsibilities. As you can appreciate, there are many factors and considerations that are incorporated into a responsible investor's voting decisions that, in the end, usually bear no connection to whether the vote is with or against any vote recommendation (management's or otherwise).

If PRI believes that a measure of responsible investing is related to how an investor votes with or against a recommendation, why is there not a similar question relating to the tracking votes for or against the recommendation of a proxy advisor?

It's our view that the PRI should be more concerned with members are casting votes in an informed manner rather than with how many times a vote is in favour or against any recommendation.

We are requesting that PRI provide feedback to Ontario Teachers' with respect to a) why this question exists, b) how does the PRI use the information gathered in this question to further responsible investing and c) why there is no similar question applicable to the recommendation of proxy advisors?

Cadillac Fairview's property management practices recognize the interrelationship between environmental, social and governance (ESG) practices and their impact on the communities in which we operate. We channel the capabilities and values of our people to positively impact these communities and influence change while creating value for our clients, partners and shareholder. Each of the following objectives include many initiatives with associated targets:

1. To reinforce and promote a culture where CF employees feel connected to our Responsibility strategy, and empowered to positively impact the communities in which they live and work.
2. To achieve the highest ESG industry standards relevant to our portfolio.
3. To have a positive impact on the communities in which we operate, and engage our clients, customers and other stakeholders in full understanding of our commitment.
4. To ensure we operate with good management practices and rigorous oversight to protect our employees, our clients, our shareholder, and other stakeholders.

Key material risks and opportunities are identified through a materiality assessment that involved interviewing internal and external resources.

Select Example: Green at Work @:

Green at Work@ is Cadillac Fairview's national sustainability operational platform. Since its official launch in 2008, we have applied leading practices to integrate sustainability into our property management and operations. Our efforts focus on five pillars for maximum impact.

1. ENERGY: To reach our target of a 2.5% annual reduction in energy, we used energy conservation techniques, leading operational standards and efficiency technologies where possible. We aim to further reduce our consumption and demand in future years.
2. WASTE MANAGEMENT: Our goal is to divert 70-90% (target by asset type) of waste from landfill every year. We continue to meet this goal by implementing an industry-leading approach to waste diversion and waste minimization. We continue to strive for zero waste throughout our portfolio.
3. ENVIRONMENTAL PROTECTION: We are focused on minimizing adverse impacts from our activities, products and services on land, air and water. With this focus, we are able to meet our target of reducing water consumption by 2% annually.
4. RESPONSIBLE PROCUREMENT: Our contractors, consultants and suppliers play an essential role in our sustainability journey. Whenever possible, we use environmentally friendly products and services and follow best management practices at all properties.
5. STAKEHOLDER COLLABORATION: We believe in Building Sustainability Together™ by working with our clients, employees, suppliers and customers to share information about our ongoing green initiatives and involve all partners in the program's success

--------	-----------	-------------	---------

INF 04.1 Provide a brief overview of your organisation's approach to responsible investment in infrastructure where you have equity stakes.

ESG considerations are an important aspect of Ontario Teachers' due diligence during the investment phase. We carefully consider all risks related to ESG and in many cases we hire advisors to provide us with further insight into critical matters. In the ownership phase, we carefully monitor ESG risks through comprehensive ERP programs, from which key risks are communicated to the Board (where we sit). We review risks and opportunities and in some cases propose steps to improve the situation (whether that be mitigating a risk or seizing an opportunity).
